Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Objections

Claim 10 is objected to because of the following informalities: in line 5 after "passed" "through" should be inserted. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 2 and 4-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 is vague and indefinite because in the last line it is unclear what "the outside" is relative to. The examiner believes that the claim should end similarly to claim 9.

Claim 2 is vague and indefinite because in the first three line of the second paragraph the claim sets forth that compressed fluid is extracted through the combustor

outer casing. As is clear from Fig. 1 the compressed fluid is extracted from the main housing and then reintroduced through the combustor outer casing.

Claim 7 is vague and indefinite because it sets forth in lines 13-16 that the "main housing can be inserted and withdrawn in the axial direction." However, it is not the main housing which is withdrawn since it is the surrounding member, it is the transition ducts which are capable of being inserted and withdrawn and this is done in a radial manner.

In lines 12 and 13 of claim 9 and lines 15 and 16 of claim 10 "said combustor outer..." should be "a combustor outer..." in order to provide correct antecedent basis.

Allowable Subject Matter

Claims 1-10 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wade discloses a gas turbine with a recuperator. Butt, Corr et al and Maceda disclose cooled transition ducts.
